

Shaping The Future Together

by Dr Elaine Hickmott | Talent Development Specialist | Career Mentor

The world needs multi-talented researchers. Innovative thinkers who create solutions to global challenges; unite cross-disciplinary teams to deliver impact and value; our future leaders.

To support this need I created *Shaping The Future Together*; a commercially-focussed professional development programme specially designed for STEM postgraduate researchers.

About Shaping The Future Together

A practical, interactive structured doctoral training programme which facilitates learning and team-working; enabling doctoral students to...

- Build commercial confidence with better understanding of business
- Develop skills for working in and leading cross-disciplinary teams
- Understand, encourage and more effectively manage innovation
- Improve engagement and interaction with industry and wider community
- Create value and impact; translating research into impactful outcomes
- Invest in transferrable skills; personal development; employability

6 Main Building Blocks

1. Entrepreneurship
2. Innovation & Creativity
3. Markets & Sectors
4. Organisations & Culture
5. Working Together & Leadership
6. Communication

Format

- Interactive and practical with activities involving team-working
- Use of case study and scenario-based learning to ensure accessibility
- Mixture of real-life examples, thought leadership perspectives, information sharing and interactive exercises
- Various tools and techniques plus how to apply them in real-life situations

Shaping The Future Together is available in 3 packages.

Shaping The Future Together Packages

All packages are designed for up to 20 participants.
